greenlite
group

Your business in the best light.

Choosing the right fitting, light levels and colour temperatures can be tricky business with so many options available on the market. That's why we offer a complete, hassle free lighting upgrade solution, designed to deliver on the outcomes that matter to your business.

- Improved Health and Safety
- Reduced Maintenance
- Customer Experience
- Improved Aesthetics
- Staff Productivity
- Stock inventory
- Energy Savings
- Assist Sales

The **perfect** process.

1. Our professional engineers visit site to survey the existing lighting systems.
2. Our experienced lighting designers source replacement products that meet your organisational requirements. Where possible, we will source replacements that are compatible with the existing housing to keep unnecessary installation costs down. A detailed proposal will break down your existing and proposed technologies, any financial savings achievable and the grants available.
3. Our qualified in-house engineering team will install the new technologies at the agreed time, making limited disruption to business activities. A risk assessment and method statement is carried out before work commences to ensure the health and safety of everyone on site.

A team of true professionals.

We don't stop there.

We are so confident in our solution that we provide 5 year comprehensive maintenance warranties on parts, labour and access.

We keep bonded stock in our warehouse so warranted items can be delivered to site next day with a Greenlite engineer attending site within 5 days. What's more, The warranty process is easy, no complicated forms or paperwork, just drop us a line.

The LED Benefit.

Low energy consumption

Modern, energy efficient lamps use up to 70% less energy.

Long-lasting lamps

LED's last up to 50'000 hours so there is no expense wasted replacing dead lamps.

No heat emitted

No need for extra comfort cooling.

Good light quality

Comfortable colour rendition that highlights the aesthetics of your products.

No outages

No dark areas that compromise health and safety and operations.

Robust and Durable

Quality LED fittings are receptive to shock and frequent vibration.
