

Offices in
the best light.

Creating a productive **working environment.**

Tiredness, eye strain and headaches - These are all signs your employees are operating under harsh lighting conditions which, could lead to negative health implications and high staff turnover.

Lighting affects our energy, mood, vitality and performance. By designing offices that enhance alertness amongst staff, we can expect a happier, healthier and more productive workforce.

Your space in the perfect light.

Harvesting natural light in working environments dramatically stimulates positive feelings and behaviour, resulting in energised staff, less absenteeism and increased engagement. Studies have shown installing a quality, full spectrum LED lighting system dramatically improves concentration and performance.

At Greenlite, we offer a complete, hassle free energy efficient lighting solution, designed to deliver on the outcomes that matter.

- Improved employee productivity
- Improved health and safety
- Improved retention
- Reduced maintenance
- Energy savings

Staffroom Lighting

Employee well-being is an integral part of the modern office. Create a place where your hard working staff can take some downtime, in a relaxing environment. Controls allow staff to alter the environment to their preference and, light accented over tables and seating areas creates a socialising area.

Main Office Lighting

People carry out dynamic tasks in the office and lighting has a profound effect on how people feel. Ensure the lighting spreads evenly throughout the space and there are no sudden breaks in light levels. A well-lit working environment will keep employees alert and productive throughout the day.

Task Lighting

Task lighting allows the user to control the light level for optimum comfort, in their immediate work environment. Allowing for lighting to be flexible and task suited can also eliminate glare on computer screens and ease eye strain.

Reception Lighting

This is where guests make their initial decision about your company's image. Create an ambience that suits your brand and exceeds your guests expectations. Lighting can help set the mood; warm lighting will relax the mood, whereas cool lighting will enhance the corporate feel of your business.

The LED Benefit

Low energy consumption

Modern, energy efficient lamps use up to 70% less energy

Long-lasting lamps

LED's last up to 50'000 hours so there is no expense wasted replacing dead lamps.

No heat emitted

No need for extra comfort cooling.

Good light quality

Comfortable colour rendition that highlights the aesthetics of your products.

No outages

No dark areas that compromise health and safety and operations.

Robust and Durable

Quality LED fittings are receptive to shock and frequent vibration.

Take Control and get ahead.

Lighting controls give you and your staff the right light, when and where you need it. Leaving lights on in unoccupied areas wastes energy. Integrated zoned and automatic controls can reap sizable energy saving opportunities for businesses. The important thing is to integrate controls and technologies that suit your business operations.

- Last man out switch
- Occupancy sensors
- Daylight dimming

greenlitegroup.co.uk

A team of true professionals.

1. Our professional engineers visit site to survey the existing lighting systems.
2. Our experienced lighting designers source replacement products that meet your organisational requirements. A detailed proposal will break down your existing and proposed technologies and, the financial savings achievable.
3. Our qualified in-house engineering team will install the new technologies at the agreed time, making limited disruption to business activities.
4. To support our confidence in our products, we provide 5 year warranties on parts, labour and access. The process is simple, there are no complicated forms, simply call or drop us an email and one of our in-house maintenance engineers will attend site.

Taking care of 9000 sites for Britain's best loved brands.

"The service you provide is first class" - **Steinhoff UK**

"The project went seamlessly. Greenlite lighting smoothed our way through the whole process, from the free audit, helping us secure the Carbon Trust funding, and installed the new fittings with minor disruption. The results are great; we're very impressed with the savings we make on our energy bills" - **Sussex Bed Centre**

"There was very little disruption to the business during the fitting, and we were really happy that Greenlite removed all of the old fittings, and cleaned up as they went along" - **ASH Plastics**

"Greenlite are very accommodating" - **Howdens Joinery**
