# Your space in the **perfect light.**

Good lighting design is critical to achieve a perfectly lit warehouse. It is essential correct light levels, colour temperatures and types of fitting are selected to ensure operational safety, production accuracy, clear stock inventory and staff productivity.

---

At Greenlite, we offer a complete, hassle free energy efficient lighting solution, designed to deliver on the outcomes that matter.

- Improved employee well-being
- Improved health and safety
- Improved stock inventory
- Reduced maintenance
- Energy savings

### Loading Dock

Loading dock lighting needs to provide staff with clear visibility for the efficient movement of materials and reading shipping documents. Fittings with high beam visibility and reduced glare will create safer working environments.

### Storage & Stockrooms

Quality stockroom lighting is essential to staff comfort, stock security and operational efficiency. Using daylight colour temperatures will assist stock inventory and boost staff well-being. Additionally incorporating presence detectors or dimming control will reduce energy consumption when unoccupied.

### Open Floor Space

Open storage areas require high level fittings that provide a well-balanced illumination with reduced glare to ensure clear visibility for workers in operation. High quality, robust and durable fittings should be selected to keep maintenance costs down.

### Racking

A cleverly designed, well lit racking area where staff can locate stock clearly, is a powerful productivity tool. Fittings with a thin beam angle specifically designed for warehouse aisles will provide light exactly where you need it.

# The LED Benefit

## **Low energy consumption**

Modern, energy efficient lamps use up to 70% less energy

## **Long-lasting lamps**

LED's last up to 50'000 hours so there is no expense wasted replacing dead lamps.

## **No heat emitted**

No need for extra comfort cooling.

## **Good light quality**

Comfortable colour rendition that highlights the aesthetics of your products.

## **No outages**

No dark areas that compromise health and safety and operations.

## **Robust and Durable**

Quality LED fittings are receptive to shock and frequent vibration.

# Take Control and get ahead.

Lighting controls give you and your staff the right light, when and where you need it. Leaving lights on in unoccupied areas wastes energy. Integrated zoned and automatic controls can reap sizable energy saving opportunities for businesses. The important thing is to integrate controls and technologies that suit your business operations.

- Last man out switch
- Occupancy sensors
- Daylight dimming

## A team of true professionals.

1. Our professional engineers visit site to survey the existing lighting systems.
2. Our experienced lighting designers source replacement products that meet your organisational requirements. A detailed proposal will break down your existing and proposed technologies and, the financial savings achievable.
3. Our qualified in-house engineering team will install the new technologies at the agreed time, making limited disruption to business activities.
4. To support our confidence in our products, we provide 5 year warranties on parts, labour and access. The process is simple, there are no complicated forms, simply call or drop us an email and one of our in-house maintenance engineers will attend site.

# Taking care of 9000 sites for Britain's best loved brands.

*"The service you provide is first class" - Harveys and Bensons for Beds*

*"The project went seamlessly. Greenlite Lighting smoothed our way through the whole process, from the free audit, helping us secure the Carbon Trust funding, and installed the new fittings with minor disruption. The results are great; we're very impressed with the savings we make on our energy bills" - Sussex Bed Centre*

*"There was very little disruption to the business during the fitting, and we were really happy that Greenlite removed all of the old fittings, and cleaned up as they went along" - ASH Plastics*

*"Greenlite are very accommodating" - Howdens Joinery*
